

## COMPLEX CLEAN SKIN

### WHAT IS CAUSING SKIN PROBLEMS?

The condition of the skin is an indicator of human health. Failures in the work of some body systems: digestive, endocrine, immune, circulatory, are reflected on the skin of the face and body. Also, the condition of the skin and hair is affected by ecology, stress, the use of low-quality cosmetics.

The most common facial skin problems are acne and blackheads, age spots, and rosacea. Basically, these problems have age-related causes associated with hormone imbalance. However, facial skin conditions may worsen at an earlier age. The reason for this may be improper skin care or the selection of poor-quality cosmetics.

Common scalp problems are dandruff and seborrhea, which cause excessive oiliness or dryness of the skin. This affects the health of the hair - they become thin, brittle and weak, begin to fall out. Problems with the scalp can be dermatological, they are also often caused by microorganisms – bacteria and fungi.

Body skin problems are similar to scalp problems. Those are dryness in the winter season, acne and blackheads, especially in the back, low skin tone and sagging. These problems are caused by both external pathogens and internal malfunctions in the body, as well as improper care, unbalanced diet and daily routine.

**DeVita AP** – the action is based on the phenomenon of resonance, in particular, the studies of the scientist and physician Royal Raymond Rife. Rife discovered that each microorganism has an individual vibration frequency, an increase in the amplitude of which leads to the death of the microorganism without harming other cells.

Viral, bacterial, fungal and other types of infections cause problems with the skin, hair, and nails. Dandruff, the formation of crusts, scales, pustules, allergic skin reactions often indicate the presence of pathogenic organisms. The DeVita AP basic antiparasitic programs affect the majority of known pathogens, quickly, efficiently and without side effects, removing the parasitic load and signs of inflammation.

“Cleansing” automatic program is used to cleanse the body after applying basic antiparasitic programs, reduces parasitic intoxication and improves both overall well-being and skin condition.

**DeVita Ritm** – In this device, the development of scientists R. Voll and A. F. Kramer is embodied, which found that each organ has a healthy frequency of oscillations. DeVita Ritm gently affects the body, by giving it the frequency of vibrations of healthy organs. As a result, the body works on self-healing.

“Healthy Day” and “Health” automatic program improve blood circulation, normalize the functioning of the gastrointestinal tract. Gently reduce toxic load, improve the nutrition of skin cells and hair follicles, normalize cellular metabolism and activate regeneration processes. The automatic program “Complete Cleansing” contributes to the restoration and harmonization of the body.

The programs «Beautiful Skin», «Beautiful Hair and Nails» relieve from inflammation, activate metabolic processes, improve skin tone, strengthen hair and nails, slow down the aging process.

**DeVita Energy** launches self-regulation mechanisms, restores physiological processes in organs and tissues, enhancing the action of the DeVita AP and DeVita Ritm programs.
