WHY CARCINOGENS ARE DANGEROUS?

Carcinogens are certain factors under the influence of which a person is more likely to develop tumor processes. Carcinogens include organic (food), inorganic (household chemicals) substances, and ionizing radiation.

The development of the process is influenced by bad habits and the ecology of the area.

Smoking is the most significant cause of cancer. Nutrition is another reason for the development of pathological processes, especially in the digestive tract. Civilization costs lead to the fact that food is contaminated with harmful environmental substances and chemicals of agriculture, including carcinogens.

Moderate doses of solar radiation has a beneficial effect on the human body.

But the desire to tan better leads to overheating, skin burns and thermal shock. Such abuse of sunbathing can lead to serious disorders in the body.

Infectious agents (some viruses, bacteria, fungi) with prolonged exposure to the body and certain conditions are also risk factors for the development of such diseases. This was proven back in 1910 and confirmed in the 1980s.

DeVita AP – the action is based on the phenomenon of resonance, in particular, the studies of the scientist and physician Royal Raymond Rife. Rife discovered that each microorganism has an individual vibration frequency, an increase in the amplitude of which leads to the death of the microorganism without harming other cells.

Prolonged presence of carcinogenic factors in the body: biological, chemical, physical, can lead to severe intoxication and uncontrolled division and proliferation of atypical cells in any human organs. The complex antiparasitic programs on the DeVita AP device help in toxic load and inflammatory reactions reduction, neutralize infectious pathogens.

“Cleansing” automatic program is used to remove toxins and reduce the toxic load on the excretory system after applying the complex of antiparasitic programs.

DeVita Ritm – In this device, the development of scientists R. Voll and A. F. Kramer is embodied, which found that each organ has a healthy frequency of oscillations. DeVita Ritm gently affects the body, by giving it the frequency of vibrations of healthy organs. As a result, the body works on self-healing.

“Healthy Day” and “Health” automatic programs have a beneficial effect on the work of the whole organism, increasing its resistance to foreign agents. Strengthens defenses, increases vitality. The use of special programs helps to reduce the load on specific organs and systems, restores their energy potential. The automatic program “Complete Cleansing” helps in main excretory system restoration and harmonizes the body.

DeVita Energy harmonizes the body’s work, energizes, activates the removal of toxins, activates the processes of self-regulation.
