

COMPLEX STOP INFECTION

HOW DOES INFECTION OCCUR?

Infectious diseases can equally affect both adults and children. Some progress mildly, while others involve dysfunction of specific organs. Among these infections, there is a group considered “childhood” infections because they are more commonly observed in childhood, and after recovery, they leave a strong immunity.

Viruses enter the human body in various ways and remain “silent” for a certain time. The incubation period can last from several hours to several months. Severe viral infections suppress the immune system, increasing the likelihood of bacterial or fungal flora joining, which further exacerbates the individual’s condition.

Bacterial infections enter the body through contact with an infected person or animal, consumption of contaminated food and water, skin and mucous membrane damage, and insect bites. After penetration, the symptoms of the disease do not appear immediately. Some people may not become ill but can be carriers for a long time.

Bacterial and viral infections are often confused with each other. It is very important to correctly identify the type of infection at an early stage to choose the appropriate treatment method and necessary protection. Since any of these infections weaken the body, it is necessary to choose the right course of action to restore energy and immunity.

DeVita AP – the action is based on the phenomenon of resonance, in particular, the studies of the scientist and physician Royal Raymond Rife. Rife discovered that each microorganism has an individual vibration frequency, an increase in the amplitude of which leads to the death of the microorganism without harming other cells.

Special DeVita AP programs are effective against most viral and bacterial agents. They not only help effectively fight them but also reduce inflammation, pain, and other undesirable manifestations of corresponding infections.

The “Mode 4” automatic program prevents the likelihood of fungal flora joining. The “Cleansing” automatic program is used to reduce the toxic load on the body after experiencing an infection.

DeVita Ritm – here the action is based on the studies of the scientists Dr. Reinhold Voll and A.F. Cramer, which found that each organ has a healthy frequency of oscillation. DeVita Ritm gently affects the body, pointing out the frequency of the vibrations of healthy organs. As a result, the body is capable of self-healing.

The automatic programs “Healthy Day - automatic” and “Health - automatic” have a beneficial effect on the work of the whole organism, increasing its resistance to foreign agents. They strengthen the defenses, increase vitality. The automatic program “Complete Cleansing” helps in main excretory system restoration and harmonizes the body.

The use of special programs normalizes blood supply and nutrition to the affected organs, triggers regeneration processes, improving their performance.

DeVita Energy harmonizes the body’s work, energizes, activates the removal of toxins, activates the processes of self-regulation.

DIRECTIONS FOR USE

NUTRITIONAL RECOMMENDATIONS FOR USING DEVITA

Do not drink carbonated alcoholic and non-alcoholic drinks - they reduce the impact of the devices. Remove or minimize coffee in your diet.

Avoid eating “junk food” (chips, crackers, etc.) - this can cause digestive problems. Drink clean drinking water, at least 1-1.5 L / day to remove toxins from the body.

USE DEVITA DEVICES IN THE FOLLOWING SITUATIONS:

- at the first sign of infection;
- to prevent possible contamination;
- to recover from an infection.

COMBINE THE DEVICES WITH DELIXIR SMART CELL NUTRITION

For best results, it is recommended to use the DeVita devices in conjunction with the DeLixir Multi-Energy, DeLixir pH and DeLixir Detox smart cell nutrition supplements.

SCHEME №1: At the first signs of infection (use for 2 weeks, if necessary, extend up to 1 month).

SCHEME №1	DEVICE		PROGRAM		APPLICATION
	1	DeVita Energy	Mode program	Energy Pro, Health	Once in the morning.

MEASURES FOR THE PREVENTION OF INFECTIOUS DISEASES

Limit contact with sick people;

Observe personal hygiene;

Perform wet cleaning of your living space.

Fight disease carriers (flies, mosquitoes, fleas, etc.).

Timely perform prophylactic vaccinations.

Take measures to strengthen the immune system (exercise, intake of vitamins, outdoor walks).

Eat a balanced diet, using natural fresh products.

You will get the most effective results by combining the preventive measures with the use of DeVita technologies and DeLixir smart cell nutrition supplements

Before use

Elevated body temperature, weakness, decreased appetite.

After 2 days of using DeVita

Decrease in temperature, improvement in well-being.

After a month of using DeVita

Cheerfulness, activity, good mood.

Use the scheme of the "STOP INFECTION" complex in conjunction with DeLixir MULTI-ENERGY, DeLixir pH BALANCE and DeLixir Detox smart cell nutrition supplements, and your results will be noticeable much faster.
