

COMPLEX STOP PARASITES

WHY PARASITE INFESTATIONS ARE DANGEROUS?

Parasites enter the body through skin, food, water, dust, from pets or other people. They can settle in all organs and tissues, and also live under the skin or on the skin. Parasites absorb vital elements, secrete toxins, destroy blood cells.

Parasites trigger many chronic diseases of the digestive tract, bronchopulmonary system, and skin. Any health-improving measures (proper nutrition, physical exercises, hardening procedures) without ridding the body of parasites will not give a positive effect.

Parasitic diseases are dangerous because they are perfectly disguised as other diseases. Symptoms of parasite infection include chronic fatigue, irritability and anxiety, hyperactivity in children, anemia, brittle nails and hair, headaches, appetite disorders, decreased immunity.

Treatment for parasites, especially in advanced cases, is very aggressive towards the body. Antiparasitic drugs have a negative effect on the liver and gastrointestinal tract, killing beneficial microflora. Therefore, it is much easier to prevent the entry and multiplication of parasites in the body.

MECHANISM OF ACTION

DeVita AP – the action is based on the phenomenon of resonance, in particular, the studies of the scientist and physician Royal Raymond Rife. Rife discovered that each microorganism has an individual vibration frequency, an increase in the amplitude of which leads to the death of the microorganism without harming other cells.

Bacteria, viruses, fungi, parasites or their toxins are the main cause of poor health and one of the leading causes of death. Parasites weaken the immune system, increase the degree of intoxication, affect organs, change the pH of the internal environment, and create an imbalance in the body. The basic anti-parasitic programs on the DeVita AP device affect the majority of known pathogens, quickly, efficiently and without side effects, removing the parasitic load and signs of inflammation.

“Cleansing” automatic program is used to cleanse the body after applying basic antiparasitic programs, reduces parasitic intoxication and improves overall well-being.

DeVita Ritm – In this device, the development of scientists R. Voll and A. F. Kramer is embodied, which found that each organ has a healthy frequency of oscillations. DeVita Ritm gently affects the body, by giving it the frequency of vibrations of healthy organs. As a result, the body works on self-healing.

“Healthy Day” and “Health” automatic program improve blood circulation in organs, relieve from stress, which helps to increase immunity.

“Complete Cleansing” automatic program affects organs taking into account their daily activity, gently cleansing the body of accumulated toxins and harmonizing the work of all organs and systems.

DeVita Energy activates self-regulation mechanisms, helps in the acceleration of the recovery processes and the distribution of energy balance. Allows the body to quickly get in shape after cleansing from parasites, maintains vigor and good mood.

DIRECTIONS FOR USE

NUTRITIONAL RECOMMENDATIONS FOR USING DEVITA

Do not drink carbonated alcoholic and non-alcoholic drinks - they reduce the impact of the devices. Remove or minimize coffee in your diet. Avoid eating “junk food” (chips, crackers, etc.) - this can cause digestive problems. Drink clean drinking water, at least 1-1.5 L / day to remove toxins from the body.

USE DEVITA DEVICES IN THE FOLLOWING SITUATIONS:

- inflammatory processes, the appearance of allergies, the deterioration of the skin, hair and nails;
- a change in appetite, increased fatigue, impaired bowel movements;
- in the presence of unexplained pain;
- to maintain health in high-risk groups: pet owners, travelers.

COMBINE THE DEVICES WITH DELIXIR SMART CELL NUTRITION

For best results, it is recommended to use the DeVita devices in conjunction with the DeLixir pH BALANCE and DeLixir DETOX smart cell nutrition supplements.

PREVENTIVE MEASURES FOR PARASITIC INFECTIONS

Thoroughly heat food and water before use. Boiling is preferable to frying. Try not to eat meat of wild animals, river fish, as well as dried and slightly salted fish.

Before you travel to tropical countries, take the necessary vaccinations. Be wary of local food.

Try not to walk barefoot on the beach - nematodes live in the sand.

After contact with stray animals, wash your hands with alkaline soap (household) - a soft toilet soap may not completely remove the parasite larvae.

Wear gloves when working in the garden.

If you travel often, walk in nature, work in the garden, have contact with pets, carry out drug prophylaxis of the parasites once a year.

Wash fruits and vegetables with soap and brush for at least 1 minute.

If you have problems with the gastrointestinal tract, muscle pain, general malaise, consult a doctor.

You will get the most effective results by combining the preventive measures with the use of DeVita technologies and DeLixir smart cell nutrition supplements.
